

## AgVantage and P3 Propane Safety Announce New Integration

### *FOR IMMEDIATE RELEASE*

AgVantage Software, Inc. and P3 Propane Safety are pleased to announce that AgVantage has successfully integrated with the P3 Compliance System. The integration is available to AgVantage customers immediately.

The integration between P3 and AgVantage Software, Inc. sends customer account information from AgVantage to P3 during the initial data push. Each day, P3 will continue to receive data as new accounts are added to AgVantage. This creates efficiencies for the mobile application, reduces data entry errors, and helps certify the accuracy of your database.

Mutual clients of P3 and AgVantage Software, Inc. can benefit from the integration further with the ability to pass inspection datapoints from P3 to AgVantage. Safety documentation entered into P3 will collect these pertinent data points and send them to AgVantage. This is a great way to see a bird's eye view of the customer information in one shared dashboard.

Tim Machutt, Vendor Relations manager at AgVantage Software, Inc. says of the integration, "It's convenient for our customers to have a mobile compliance system that integrates with their back-office software. It's a huge time-saver and promotes efficiency across all departments of a propane operation."

"AgVantage Software, Inc. consistently evolves and advances their product for the benefit of their clients and propane users across the country—a value that aligns closely with P3's mission and business model," said Jane Lapsley, Project Manager at P3 Propane Safety. "We are pleased to integrate with them to provide increased operational efficiency and data accuracy to our mutual customers."
