Check Your PULSE With AgVantage!

By Jason Schneider, Customer Communication Specialist - jasons@agvantage.com

Introducing PULSE (Product Update Listing and Service Education) – Our next gen way of delivering personalized product enhancement information directly to you, the end users, right in Edge. No more having to seek out website message boards and managing logins to gain access to product update information only to have to sift through all of the product logs and PTF information to get to the needed information. PULSE will deliver that information directly to you, in Edge, based on the products you are licensed for, as soon as that enhancement is released. Best of all, there is nothing you have to do to gain access to this information as PULSE will be turned ON for all Edge users by default, free of charge.

How does PULSE work? Whenever we release a new Product Enhancement or PTF for Edge, we will no longer update the old Message Board and instead will now push that same information to the end users in Edge via PULSE. Each user will be notified in Edge of any new enhancements that are available to them (based on the products they are licensed for) by the PULSE icon in the black Edge Menu Bar. Click on the PULSE icon to be taken to the PULSE landing page where they may then access the notifications based on product type. Notification information can include detailed text, links, attachments such as documents or images, or even a short video of how the new feature works. Once a notification has been read, it will automatically be marked as such and the total number of unread notifications will be reduced, all while leaving that product information out there and available for reference later. Edge Admin users

“Each user will be notified in Edge of any new enhancements that are available to them...”

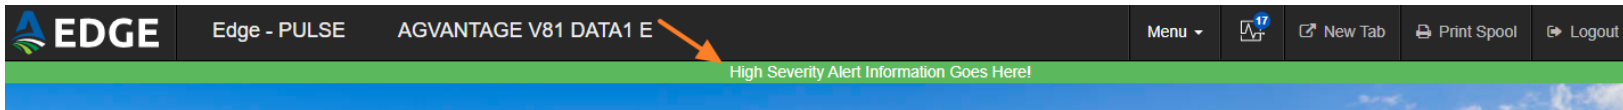

(continued on page 2)

will have access to all product update notifications and can turn off notifications for individual users.

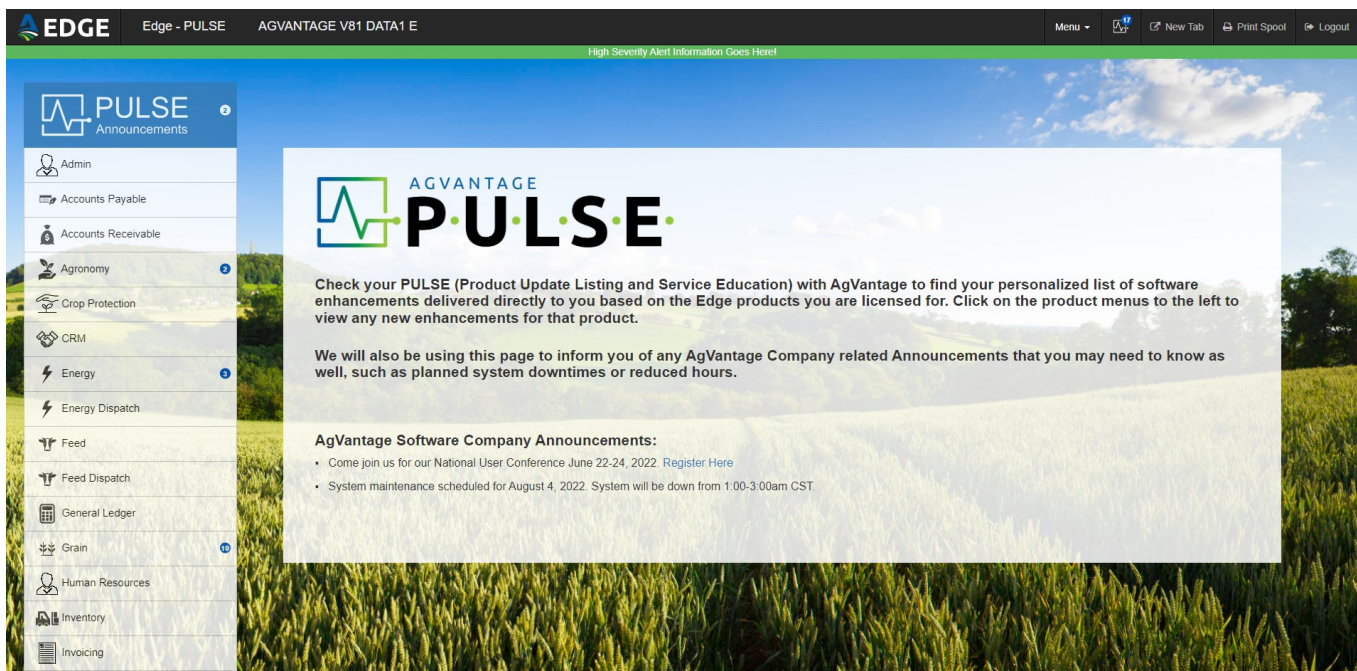

AgVantage Software Company Announcements:

- Come join us for our National User Conference June 22-24, 2022. [Register Here](#)
- System maintenance scheduled for August 4, 2022. System will be down from 1:00-3:00am CST.

Wait, there's more! Not only will we be delivering product update information to you in Edge, we will also be delivering AgVantage Software Company related Announcements through PULSE as well. These Announcements will consist of important information that AgVantage would like for you to know - such as planned system downtimes, reduced holiday hours, event information, newsletters, etc.. and can be found on the PULSE landing page. In extreme circumstances, we will Alert all Edge users of high severity information, such as if our phone lines were to go down and how to best contact us, through a green Alert bar that will show up in all areas of Edge under the main black Edge Menu Bar and will stay there until the issue is resolved.

Our hope with PULSE is to better educate and communicate to each of our users the important and pertinent information they need to know to help them better do their jobs in the easiest way possible. I hope you are as excited about PULSE as we are about bringing it to you and we cannot wait to start to deliver this information to you in the beginning of August. Please contact me at jasons@agvantage.com with any comments, questions, or concerns regarding PULSE.

AgVantage National Conference Recap & Photos

By Lisa Sick, VP Marketing & Conferences - lisas@agvantage.com

What a fantastic 2022 National Conference! Thank you to all who participated as customers, guests, business partners and speakers. You made this a successful event for all who attended virtually and in-person.

A few highlights:

Sea Life – A perfect venue in the Mall of America to begin our deep dive into this conference. We even had a few sharks with us!

Grain Merchandising 101 – A great discussion for beginners and seasoned users to dive into this deep topic.

John Kriesel – Having John as our keynote speaker to kick off this conference got us all in the right frame of mind to be thankful.

If you didn't get one of his books, they can be purchased at johnmkriesel.com

We all enjoyed his story and appreciate his service to our country!

(continued on page 4)

So many great Sessions! – Many outstanding deep discussions took place on a wide variety of topics. Grain, Agronomy, Energy, BI, Accounting, more. AgVantage staff, customer presenters, Cyber Security experts, IT Panel, all shared important information.

POCKT – Seeing this new AgVantage product made for producers and growers gives us all something to be excited about! Being able to offer this to customers is a huge advantage.

Imagine you can...

- ✓ Access account balances and statements
- ✓ Look up invoices and pay on account
- ✓ View grain contracts and tickets
- ✓ Check Agronomy orders and prepayments

RIGHT IN YOUR POKET POCKT!

Coming soon... fuel orders, delivery history, and agronomy plans.

It's all in your own...
POCKT PORTAL OF COMMUNICATION, KNOWLEDGE & TECHNOLOGY
...everyday, and everywhere.

Fair on 4th – It was a lot of fun to be able to let loose together and throw axes, drive go carts, dance to Martin Zellar and the Hardways, and play some fun games together.

Meet the Pros – Hearing from your peers about aspects of your business carries so much weight. These were great discussions.

(continued on page 5)

Top Golf – It was a beautiful night to play or just have fun at Top Golf.

Having Tim Gabrielson there to share his magic was astonishing.

PULSE – Enhancing the communication to all AgVantage customers is a win-win product that everyone can use. We look forward to seeing this roll out into production. (See Jason’s article on pages 1 & 2)

Baby Sharks – What an impressive group of FFA students who joined us for this look at young energetic people embarking on their future in the ag industry. Let’s all continue to encourage and support the FFA programs in our areas.

**Save the date for 2023!
It will be held June 21-24
at Mystic Lake Casino.**
